NANDINI

Writer | Data Entry | MS Office | Documentation

Professional Summary

Entry-level data and documentation specialist with 80 WPM typing speed and hands-on Excel, Word, and PowerPoint skills — proven through volunteer data-entry work processing 100+ records with zero errors under deadline pressure. Comfortable turning messy, unstructured information into clean, accurate output fast.

Known for staying accurate and calm under time pressure — reliable with deadlines.

Skills

- Microsoft Excel — data entry & organization, VLOOKUP/XLOOKUP, pivot tables, dashboards, data cleaning
- Microsoft Word — formatting, tables & layouts, reports, proofreading
- Microsoft PowerPoint — slide design, layouts, visual hierarchy
- Writing — content writing, proofreading, editing & rewriting, research, professional communication

Volunteer Experience

Data Entry Volunteer — School Annual Function & Library | U.S.P.C. Jain Public School

- Processed 100+ event sign-up entries for the school's annual function with zero recorded errors, by keyboard typing at 80 WPM and using Excel keyboard shortcuts to keep pace with a high volume of walk-in registrations.
- Digitized and organized the school library's catalog records with consistently high accuracy under tight time constraints, by applying structured data-entry conventions and keyboard-shortcut-driven workflows to move through large batches quickly.

Independent Projects

Data Management & Excel

- Cleaned and corrected inconsistencies across multi-row datasets to produce audit-ready, error-free records, by applying VLOOKUP/XLOOKUP, sorting, and filtering functions.
- Turned raw data into decision-ready visuals that made trends immediately readable to a non-technical viewer, by building pivot tables and dashboards in Excel.

Document & Presentation Design

- Converted unstructured source material into polished, submission-ready documents with consistent formatting throughout, by applying Word's table, layout, and styling tools.
- Delivered structured, presentation-ready slide decks suitable for direct use in a professional setting, by designing clear layouts and visual hierarchy in PowerPoint.
